

KABIR FAYE

Cloud Solutions Architect | AWS | DevOps | Platform Engineering | AI

Stuttgart, Baden-Württemberg, Germany | fayekabir21@yahoo.com | www.linkedin.com/in/kabir-faye

PROFESSIONAL SUMMARY

Cloud Solutions Architect and Head of AWS Engineering with 12+ years of experience across technology and data operations, including 9+ years in AWS cloud, DevOps, architecture, networking, automation, and programming. Led multimillion-dollar cloud transformations across automotive and retail. Designs and ships generative AI solutions such as multi-agent architectures, RAG pipelines, and AI/ML integrations with enterprise systems. Certified at Professional and Specialty levels across AWS and Aviatrix multicloud networking. Builds and mentors AWS engineering teams across consulting and enterprise delivery environments.

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Mar 2024 – Present

Professional Services Delivery Engineer | Rackspace Technology

- Led cloud migration of a centralized planning and monitoring platform from on-premises to AWS across ECS Fargate, Route 53, CloudFront, WAF, ALB/NLB, Secrets Manager, S3, KMS, and secure RDS/Aurora access
- Owned CI/CD strategy and infrastructure automation with GitHub Actions, GitLab CI, Terraform, Terragrunt, Docker, Amazon ECR, and ECS; deployment velocity rose by 30%
- Enforced shift-left security in CI:** gated Terraform validate/plan/apply behind automated scans using Trivy (IaC misconfiguration and secret scanning) and Deepfence (workload/runtime security), with OIDC role assumption for short-lived AWS access and secured private module access
- Delivered the Metis AI platform, an event-driven AWS AI system using Bedrock, Textract, Transcribe, Translate, Comprehend, Cognito, ECS, Lambda, API Gateway, and SNS/SQS
- Managed Aviatrix multicloud networking across AWS and Azure, including ActiveMesh, SmartGroups, Distributed Cloud Firewall, and centralized egress
- Built observability across Datadog, Prisma Cloud, Prometheus, Grafana, CloudWatch, GuardDuty, and Security Hub, with automated runbooks and structured incident response; MTTR fell by 25%
- Defined and rolled out engineering standards (code review, IaC patterns, and documentation) adopted across all delivery teams, and led knowledge transfer on agentic AI (Bedrock), local LLMs, and CI/CD shift-left

Senior Principal Cloud Architect | JJ Tech Inc.

Apr 2020 – Feb 2024

- Multi-Account AWS Foundations:** Designed and scaled secure multi-account AWS environments using AWS Organizations, SCPs, Control Tower, centralized logging, and cross-account IAM roles across development, staging, and production workloads
- Team Leadership & Growth:** Led an 11-person AWS engineering team, owning hiring, onboarding, mentoring, technical standards, and career development that reduced attrition and built a promotion pipeline
- Reusable Terraform Architecture:** Authored reusable Terraform modules for VPC, ECS, RDS, IAM, ALB, security groups, and environment baselines, cutting new environment provisioning from days to under 2 hours and improving deployment consistency
- CI/CD at Scale:** Built and operated CI/CD pipelines using Jenkins, GitLab CI, GitHub, CodePipeline, CodeBuild, and CodeDeploy; release frequency increased by 40% and manual deployment effort and configuration drift decreased
- Network & Security Architecture:** Architected hub-and-spoke VPC topologies with Transit Gateway, custom route tables, private subnet segmentation, security groups, and IAM least-privilege controls to reduce identity and lateral-movement risk

- **Disaster Recovery & Resilience:** Designed high-availability and multi-region disaster recovery architectures, automated failover testing, documented operational runbooks, and established RTO/RPO-driven recovery practices for critical workloads
- **Database & Application Operations:** Managed RDS, DynamoDB, database snapshots, read replicas, lifecycle policies, and performance tuning in collaboration with application engineering teams to improve reliability and response times
- **CloudFormation & Ansible Automation:** Developed CloudFormation stacks and Ansible playbooks for EC2 configuration, application bootstrapping, compliance baselining, patching, and repeatable environment configuration
- **Governance & Quality Controls:** Integrated security scanning, code quality, and compliance practices using Checkov, SonarQube, CloudTrail, AWS Config, and CloudWatch to improve audit readiness and enforce operational standards

AWS Cloud Consultant | The Will Group, Inc.

Feb 2019 – Mar 2020

- **Migration Delivery:** Led end-to-end AWS migration engagements for enterprise clients, producing Statements of Work, Proofs of Concept, architecture diagrams, and phased migration roadmaps that cut time-to-cloud by an average of 35% against client self-managed estimates
- **Architecture Design:** Designed target-state AWS architectures covering networking, compute, storage, IAM, monitoring, and compliance controls, translating business requirements into documented technical solutions aligned to AWS Well-Architected best practices
- **Cross-Functional Delivery:** Partnered with client security, DevOps, and development teams to harden cloud infrastructure, deliver operational runbooks, and conduct stakeholder workshops supporting independent operations after handoff
- **Post-Deployment Support:** Provided architecture reviews, troubleshooting guidance, technical documentation, and knowledge transfer to help client teams operate and scale AWS environments independently

AWS Cloud Engineer | Olam Group

Jan 2017 – Jan 2019

- **Legacy Migration:** Migrated legacy applications from internal data centers to AWS, cutting infrastructure spend by 20% while improving application availability and supporting enterprise cloud transformation initiatives
- **Secure Architecture:** Implemented private subnets, bastion hosts, NAT Gateways, Security Groups, NACLs, WAF, Shield, encryption in transit and at rest, and Route 53 routing policies for secure AWS workloads
- **CI/CD & Containers:** Developed Docker-based deployments and maintained Jenkins, GitHub, GitLab CI, and Ansible automation workflows for consistent application delivery across environments
- **Operations & Governance:** Configured CloudWatch alarms, Lambda automation, AWS Organizations governance, disaster recovery architectures, failover testing, and operational troubleshooting for cloud-hosted applications

Data Processing Clerk | Riders for Health (RFH), The Gambia

Feb 2011 – Feb 2014

- Maintained accurate operational records by validating, standardizing, and digitizing data
- Resolved missing, duplicate, and inconsistent records through source-document verification
- Produced timely operational summaries supporting reporting and planning

TECHNICAL SKILLS

Cloud & Compute: AWS, EC2, VPC, IAM, S3, ECS, EKS, Fargate, Lambda, RDS, Aurora, DynamoDB, API Gateway, Route 53, CloudFront

IaC & CI/CD: Terraform, Terragrunt, CloudFormation, Ansible, GitHub Actions, GitLab CI, Jenkins, Docker, Kubernetes

Networking & Multicloud: Aviatrix, Transit Gateway, Direct Connect, ALB/NLB, Distributed Cloud Firewall

Security & Observability: KMS, Secrets Manager, Prisma Cloud, Trivy, Checkov, GuardDuty, Security Hub, Datadog, Prometheus, Grafana, CloudWatch

AI & Platform Engineering: Amazon Bedrock, RAG, Agentic AI, Model Context Protocol (MCP), SageMaker, Event-Driven AI, Internal Developer Platforms

Programming: Python, Go, Bash, Linux, Git

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CERTIFICATIONS

- AWS Certified Security - Specialty
- AWS Certified DevOps Engineer - Professional
- AWS Certified Solutions Architect - Associate
- AWS Certified AI Practitioner
- HashiCorp Certified: Terraform Associate
- Aviatrix Multicloud Network Professional
- Aviatrix Multicloud Network Security Specialty
- Aviatrix Multicloud Network Cloud Backbone Specialty
- Aviatrix Multicloud Network Operations Specialty
- Aviatrix Multicloud Network Associate

PROFESSIONAL DEVELOPMENT

- Artificial Intelligence and Business Strategy
- Generative AI for Business Leaders
- AI-Ready: Foundational
- AI-Ready: Practitioner
- Responsive Web Design

EDUCATION

Bachelor of Science in Computer Engineering, University of The Gambia, Banjul | 2009 – 2013

Diploma in Software Application, Microtech Institute of Technology | 2012

Diploma in Information Technology & Hardware, QuantumNet Institute of Technology | 2011 – 2012

LANGUAGES

English Fluent · German C1
